To whom this may concern,

This letter explains the Pareve status in the Herbalife products that contain milk protein that is less than shishim (60th).

Rabbi Abadi the Rav Hamachshir explains the Halacha is as follows: if the company makes their formulation a certain way, which in this case is that the milk is only 1% and therefore is botel beshshim, it is considered Lechatchila and the mix is Pareve. There is no reason to label it milichic if Halachically it's now Pareve.

A handwritten signature in black ink that reads "Rabbi Yosef" followed by a stylized flourish.

Rabbi Yosef Tesler / Administrator
